## Summary

### Hello, I am a Full Stack Developer.

I specialize in developing modern, scalable, and high-performance web applications, covering both frontend and backend development. My expertise includes React (Vite.js, Next.js), TypeScript, and advanced styling techniques with Tailwind CSS, Sass, and Bootstrap. On the backend, I work with Node.js, Nest.js, and databases like PostgreSQL and MongoDB.

### What I Work With

- **Frontend:** React, Vite.js, Next.js, TypeScript, Tailwind CSS, Bootstrap, Sass
- **Backend:** Node.js, Nest.js, Express.js
- **State Management:** Context API, Redux
- **API Integration:** REST API, Ajax (including Telegram bots)
- **Databases & Backend Interaction:** Firebase, SQL (PostgreSQL), MongoDB
- **Development & Optimization:** Docker, GitHub, GitLab, Jira
- **UI/UX & SEO:** Figma, jQuery, SEO Optimization
- **Payment & Subscription Systems:** Stripe, PayPal

### Featured Projects

#### Online Store ([GitHub](#))

**Tech Stack:** React, Vite, Bootstrap, Redux, Tailwind CSS, PostgreSQL, JWT Authentication, Stripe

**Description:** A fully functional e-commerce platform with authentication, product management, cart functionality, and payment processing. The project includes a responsive UI, secure authentication with Firebase, and a smooth checkout process via Stripe.

#### Music Platform (Client & Server)

**Client:** [GitHub](#)

**Server:** [GitHub](#)

**Tech Stack (Client):** React, Next.js, Redux, TypeScript, Sass

**Tech Stack (Server):** Node.js, Nest.js, MongoDB, TypeScript

**Description:** A streaming platform that allows users to upload, manage, and listen to music. The frontend ensures a seamless user experience with fast-loading UI and responsive design. The backend provides authentication, database management, and secure API handling.

### More Projects

- [Article](#) – Blog platform with markdown support
- [Quiz](#) – Interactive quiz application
- [Findtrend](#) – Trend analysis platform
